

I live in an area in which I do not always have access to my local stations due to extreme variances in terrain. This is one of the main reasons that I subscribe to XM radio. Local stations will retain my listening when they give me good programming. They should not be protected by artificial barriers that would keep me from getting good programming and sometimes vital information. Please reject NAB's petition 04-160 as they should not be able to dictate what programming I desire to hear.
